

SAMI's PAS55 ASSESSMENT

PAS55 Assessment

PAS55 Understanding

PAS55-1 Defines Asset Management as:

Systematic and coordinated activities and practices through which an organization optimally and sustainably manages its assets and asset systems, their associated performance, risks and expenditures over their life cycles for the purpose of achieving its organizational strategic plan.

The development of the Publicly Available Specification (PAS) has been led by the Institute of Asset Management (IAM), in collaboration with the British Standards Institution (BSI).

The International Standards Organization (ISO) has now accepted PAS55 as the basis for development of the new ISO 55000 series of international standards; planned publication in 2014.

SAMI PAS55 Options

- GAP Analysis for PAS55 compliance
- Formal PAS55 Assessment for certification
- GAP Analysis combined with other assessments. SAMI keeps the PAS55 element assessment separate (arms length) from other assessment offerings but can provide these Consulting services while on-site

The SAMI PAS55 Assessment Methodology

- Interviews with management team and persons performing the actual work.
- We schedule and execute contacts to minimize the impact on standard work processes
- Comparison of current performance against the 28 elements of PAS55
- SAMI will also triangulate the interview information with documentation and metrics. If applicable, some limited/selective observations from key meetings
- Analysis of the collective information will be used to assign the maturity level of each element

Please contact SAMI today to answer your PAS55 questions and begin the discussion of developing a Performance Culture in your organization
